FEBRUARY IS HEALTHY HEART AWARENESS MONTH

Heart disease is the leading cause of death in the United States for both men and women. According to The Center of Disease Control (CDC), about 715,000 Americans have a heart attack and about 600,000 die every year.

The month of February is dedicated to raising awareness of heart disease.

The first step to prevention is knowing and understanding the warning signs:

Heart attack warning signs include:

A pressure, a feeling of fullness or squeezing pain in the center of the chest that lasts for more than a few minutes.

Pain extending beyond the chest to the shoulder, arm, back or even to the teeth and jaw

A prolonged pain in the upper abdomen

Shortness of breath

High Blood Pressure symptoms may include:

Severe headache, Blurred Vision, Chest pains, Difficulty breathing, Irregular heartbeat

Pounding in the chest, neck or ears

To detect if experiencing a Stroke; Remember these simple "FAST" steps:

Face-Ask one to smile and check for weakness on one side of the face

Arms-Raise both arms at the same time and check for weakness or numbness

Speech-Ask one to say a simple sentence to check for slurred speech

Time-Call 911 immediately and note the time the symptoms started

Some people will never experience any of these symptoms. As with most men and women, the most common symptom is chest pains or chest discomfort. But women are somewhat more likely than men, to experience some of the other common symptoms, such as shortness of breath, nausea/vomiting and back or jaw pain.

Prevention----What to do?

Know your family history

Know the risk factors

Maintain a healthy weight and a healthy diet

Limit alcohol and salt intake

Manage your diabetes, Stay physically active. Exercise regularly; at least 30 minutes/day American Heart

Association Recommends maintaining your Blood pressure

120/80mmHg or less; and Total cholesterol less than 200mg/dl.

The good news is that you can take steps to reduce your risk of heart disease by becoming aware of the warning signs and making the necessary lifestyle changes.

The Health Team will be doing blood pressure screenings the 2nd & 3rd Sundays after worship in February as part of the healthy heart awareness month.
