“A Note From the RHBC Health Ministry”

Men's Health issues don't affect only men, they have a significant impact on everyone around them. Men must be gently reminded that the family, esp. the children, are influenced by the example they set when forming life-long health habits. Black men are at higher risks for heart disease, high blood pressure, prostate & lung cancer, & diabetes. Awareness include: regular health screenings, healthy eating, regular exercise, avoiding unhealthy behaviors, such as smoking, excessive alcohol intake, insufficient sleep & lack of a stress management program. We must heighten men's awareness of preventable health problems & encourage early detection & treatment.

**Every Sunday Morning
