“From the RHBC Health Ministry”

June is Men’s Mental Health Awareness

The goal is to heighten the awareness of preventable health problems & to encourage early detection & treatment of diseases among men & boys.

Some of the diseases that disproportionately impact black men & boys include:

- Heart diseases like stroke & high blood pressure;
- prostate cancer,
- diabetes,
- obesity &
- suicide which is the 3rd leading cause of death in black young men 15-24yrs old.

Healthier lifestyles must be encouraged which include proper plant-based nutrition, smoking cessation, regular exercise & stress management techniques.

We must share healthy awareness information with the men in our lives.

Encouragement is especially important during this pandemic.

All families must remain cautious, stay safe & continue to adhere to the CDC guidelines towards efforts of infection control.
