“From the RHBC Health Ministry”

January Continues as a  
Disease Prevention/Health  
Promotion Month

The Flu viruses, the COVID-19 virus & now the omicron variant continue to spread. Healthcare systems are overwhelmed, treating these patients; A reason why getting the Flu vaccine, the COVID vaccine & boosters is SO important when eligible, available & as recommended by your healthcare provider & the scientific team. Be aware of the major 7 Flu symptoms include: fever, chills, body aches, cough, sore throat, headache & fatigue. COVID-19 can include these; PLUS loss of taste or smell, diarrhea/vomiting & breathing difficulties. Get tested & Quarantine or isolate if exposed as required, to contain the spread. We must continue to commit to health promotion & disease prevention by practicing a healthy lifestyle with daily devotion, getting enough sleep, eating mindfully, exercising regularly & following the CDC guidelines & precautions, especially in this month during the pandemic & the fast new spread of the omicron virus. Protect yourself & others & help reduce the chances of severe symptoms &/or death by being fully vaccinated.
